What's next for the Safe Mobility Strategy?

We're excited to move forward with a plan to make transportation safer for everyone in the County. Here's what's coming up:

STEP 1: LAYING THE GROUNDWORK (Fall–Winter 2025)

We're reviewing past collision data and checking where current safety programs might be falling short. This will help us build a strong foundation for the strategy.

STEP 2: HEARING FROM YOU (Late 2025–Early 2026)

We'll be reaching out to residents and key partners through surveys, public info sessions and workshops. We'll also be working with groups like the RCMP, emergency services, schools and neighbouring municipalities. If you haven't submitted your suggestions for recommended traffic calming locations yet, please consider sharing your thoughts. You can do so by clicking on 'Report a Road Concern' at the link below, or by scanning the QR code.

STEP 3: BUILDING THE PLAN (Early 2026)

We'll use all the feedback and data to identify top safety priorities, draft a capital plan and create the full Safe Mobility Strategy. This includes figuring out what resources we need, how we'll measure success and where funding might be sourced from.

For more details, including a list of completed works to date, please scan the QR code or visit **SturgeonCounty.ca/traffic-safety**

Sturgeon COUNTY

Thanks to your input, we're making roads safer together.

We're grateful for the strong community response to our Traffic Calming Program. Thanks to your feedback, we've already rolled out several key safety improvements in your neighbourhood.

In 2024, Sturgeon County took a big step forward by approving our first-ever Traffic Calming Policy. This gave us a solid foundation to respond to concerns from residents and Council about road safety.

Now, we're building on that progress with a new **Safe Mobility Strategy**. This strategy will help us tackle all kinds of transportation safety challenges and move us closer to our goal of a future with zero serious injuries or fatalities on our roads.

The new strategy will evolve our current program into a more complete **Mobility Safety Program**, keeping community input front and center. It will help us better understand and prioritize safety concerns from residents like you, making sure everyone—whether walking, biking, or driving—can move around safely.

Keep reading to learn more. You can also scan the QR code on the back of this pamphlet for more detailed information on our website.

What we're hearing about road safety

Thanks to everyone who's shared feedback on road safety through our website! Your input is helping us understand what matters most to residents across the County. Here are some of the common areas of focus we've heard so far:

- **CROSSWALKS & PEDESTRIAN SAFETY**
- **SPEEDING & SPEED LIMITS**
- **CYCLIST & PEDESTRIAN PROTECTION**
- **ROUNDABOUTS & INTERSECTIONS**
- **ENFORCEMENT & NOISE**
- **OTHER INFRASTRUCTURE ISSUES**
